REGISTER FOR THE PAPIRUS FINAL CONFERENCE!

<http://papiirus-final-conference.k4design.pl/en>

The conference is open for everyone who is interested in Public Procurement of Innovation. Including public procurers, suppliers, experts, legal advisers , policy makers and others.

Background information

PAPIRUS project is one of the pilot project in the area of Public Procurement of Innovation co-financed by the European Commission within the Entrepreneurship and Innovation Framework Programme. It has started in October 2013 and now is reaching its final stage.

To share with you our results and achievements, PAPIRUS Partners are organizing a final project conference open and free of charge for everyone. Public procurers who have implemented Public Procurement of Innovation and experts in the field will present case studies and share their experience on Innovation Procurement.

Why procuring innovation?

Procurement of innovation helps public authorities to achieve more efficient and effective public services and provides more environment friendly solutions. As the total public spending is equivalent to 19 % of EU gross domestic product, public procurements is an important market driver and can be a tool in market transformation towards more sustainable solutions. Procurement of innovation is not only beneficial for public authorities but also for companies, especially SMEs. They can gain new business opportunity and resources for the development of innovation which may boost their competitiveness on the market. Supporting innovative activities is now one of the key policies of the European Union, included among others in Europe 2020 Strategy.

When and where?

PAPIRUS project final conference will be organised in Bilbao (Spain) on 29th September 2016.
